

HATCHERY PRODUCTION

February 1967 and 1966 Annual Revisions

UNIV. OF FL LIB
DOCUMENTS DEPT.

March 16, 1967

Chick Production U.S. DEPOSITORY

Hatcheries produced 263 million chicks during February 1967, an increase of 6 percent from a year earlier according to the Crop Reporting Board. The February hatch of broiler-type chicks totaled 217 million, 5 percent more than a year earlier. During the first 2 months of 1967, there were 438 million broiler chicks produced, up 3 percent from the same months last year. Broiler-type eggs in incubator on March 1 were up 7 percent from a year earlier. The revised number of broiler-type chicks hatched during 1966 totaled 2,747 million exceeding the preceding year's record hatch by 9 percent.

Egg-type chicks hatched during February are estimated at 46 million, 13 percent more than in February 1966. The February egg-type hatch was above a year earlier in all regions of the United States. The largest regional increase from February 1966 was 22 percent in the South Atlantic, followed by 20 percent in the West North Central, 18 percent in the South Central, 15 percent in the East North Central, and 2 percent in both the North Atlantic and West. During the first 2 months of 1967, there were 87 million egg-type chicks hatched, up 12 percent from the same 2 months in 1966. The number of egg-type eggs in incubator on March 1 was 1 percent above the year earlier. The revised number of egg-type chicks hatched in 1966 totaled 569 million, 16 percent more than in 1965.

Poult Production

Poult production of all breeds during February 1967 totaled 13,902,000 poults, up 25 percent from the 11,142,000 poults hatched the same month a year earlier. The hatch of heavy breeds totaled 12,895,000 birds compared with 10,194,000 the same month a year earlier. Light breeds totaled 1,007,000 poults -- up 6 percent. There were 22,317,000 turkey poults hatched during the first two months of 1967, a 31 percent increase from the corresponding period of 1966. The number of turkey eggs in incubators on March 1, 1967 totaled 32,081,000, up 5 percent from March 1 last year. The revised 1966 annual poult production for all breeds was 130,949,000 poults; a record high and 12 percent more than the 116,878,000 poults produced during 1965.

1/ Less than three hatcheries. Numbers included in regional and United States totals.

Number of hatcheries and egg capacity, January 1, 1967

The number of chick hatcheries operating in the United States on January 1, 1967 was 1,932 compared with 2,365 on January 1, 1965 and 2,911 on January 1, 1963. Egg capacity of these hatcheries on January 1, 1967 was 468,143,000 compared with 471,318,000 for those operating on January 1, 1965. The decrease in the number of hatcheries operating during the past 2 years was general throughout the country. Increases in egg capacity were reported only in 2 regions of the country - South Atlantic and South Central. Between January 1, 1965 and January 1, 1967, there was an increase in both the number and egg capacity of hatcheries with 500,000 egg capacity and over. This group accounted for 54 percent of the total egg capacity on January 1, 1967, compared with 45 percent on January 1, 1965. Hatcheries with a capacity from 100,000 to 499,999 eggs had 36 percent of the total egg capacity in 1967 compared with 42 percent in 1965 and 46 percent in 1963.

Fewer and larger turkey hatcheries have been the trends during the past 8 years of available statistics. The 407 hatcheries operating as of January 1, 1967 compares with 453 on January 1, 1965 and 682 on January 1, 1959. Egg capacity increased from 51,085,000 eggs on January 1, 1965 to 56,983,000 on January 1, 1967. There was a decrease in number of hatcheries but an increase in egg capacity between 1965 and 1967 in turkey hatcheries having an egg capacity of 500,000 eggs and over. On January 1, 1967 turkey hatcheries having an egg capacity of 100,000 to 499,999 eggs had 62 percent of the total egg capacity of all turkey hatcheries compared with 55 percent on January 1, 1965.
